

About Us

AIS (Asia Interaction Supports) aims to facilitate the interaction among people across Asia and around the world, through various services, and to spread the joy of travel.

- We offer the most rewarding methods of interaction, presenting travel from a new viewpoint.
- We provide our customers with experiences and interactions that are unforgettable.
- We improve the quality of interactions by training hospitality providers.
- We promote intercultural learning by sharing the charms of Japan and other Asian countries and supporting communication.

In September 2025, we launched Japan Adventurer – a new brand for English-speaking inbound travelers to Japan. Besides selling travel products, we also offer a comprehensive inbound tourism solution that supports local governments and tourism organizations in revitalizing their regions through tourism. Our approach combines consulting, product development, promotion, and actual sales, providing end-to-end support for regional inbound strategy and execution.
